DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art fails to disclose, teach or suggest an automobile pillar airbag device particularly comprising: a pillar trim deviation-prevention mechanism comprising a strap having ends connected with the front pillar and the pillar trim, respectively, and screws for coupling each end of said strap to the front pillar and said pillar trim respectively. These structures in combination with other structures as recited in claim 1 define over prior art of record.

With respect to claim 5, the prior art fails to disclose, teach or suggest a pillar airbag device particularly comprising at least one fixation protrusion extending from the side trim and coupled to the front pillar wherein the fixation protrusion is configured to break when a force is applied by the curtain air bag during deployment of the air bag such that an opening is created between the side trim and the front pillar for protrusion of the air bag; and a strap coupling the side trim to the front pillar. These structures in combination with other structures as recited in claim 5 define over prior art of record.
